Abstrak

Cakupan Metode Kontrasepsi Jangka Panjang (MKJP) wanita di Kecamatan Bintan Timur belum mencapai target dan tidak mengalami peningkatan yang berarti, diasumsikan berhubungan dengan faktor perilaku istri PUS sebagai akseptor KB. Penelitian berdesain cross sectional dengan pendekatan kuantitatif ini, bertujuan untuk mengetahui faktor-faktor yang berhubungan dengan penggunaan MKJP wanita. Dilaksanakan di Kecamatan Bintan Timur pada bulan April-Mei 2013, melalui wawancara menggunakan kuesioner pada 170 responden. Hasil penelitian menunjukkan hanya 19,4% responden menggunakan MKJP serta ada hubungan yang bermakna antara umur ( $p=0,000$ ), pendidikan ( $p=0,010$ ), jumlah anak ( $p=0,000$ ), keterjangkauan terhadap pelayanan ( $p=0,000$ ) dan keterpaparan informasi ( $p=0,000$ ) dengan penggunaan MKJP wanita pada istri PUS.

.....

The coverage of Women's Long Term Contraception Method (LTM) in East Bintan district has not reached the target and does not experience a significant increase, it is assumed to be related to the factor of PAC wife's behavior as acceptors. This cross-sectional study design with quantitative approach aims to determine the factors associated with the use of women's LTM. It is implemented in East Bintan District during April-May 2013 through interviews by using questionnaires on 170 respondents. The results show that only 19.4% of respondents use the LTM and there is no significant correlation between age ( $p = 0.000$ ), education ( $p = 0.010$ ), number of children ( $p = 0.000$ ), affordability of service ( $p = 0.000$ ) and exposure to information ( $p = 0.000$ ) with the use of woman's LTM on PAC wife.
