Abstrak

Tujuan peneliti adalah untuk memperoleh tentang gambaran pemanfaatan kunjungan posbindu lansia di Kelurahan Cisalak. Pendekatan penelitian adalah kualitatif. Data penelitian diperoleh dengan instrument panduan Diskusi Kelompok Terarah (DKT) dan Wawancara Mendalam (WM). Hasil penelitian ini menunjukkan bahwa adanya kecenderungan hubungan antara faktor predisposisi, faktor enabling, faktor penguat dan faktor kebutuhan terhadap posbindu dalam memeriksakan kesehatan bagi lansia. Hasil penelitian menyarankan agar Kepala Dinas Kesehatan untuk melakukan meningkatkan kegiatan promosi kesehatan di posbindu lansia.

.....The research objective is to know the representation of elderly Integrated Founding Post visit utilization in Cisalak Village. Research approach is qualitative. Research data is obtained using instrument of Focus Group Discussion guide and Comprehensive Interview. Research result discovered that there is a propensity relationship among predisposition, enabling, reinforcing and need factors toward elderly health check in Integrated Founding Post. From the research result, it is suggested that Head of Health Department need to do advocacy to Mayor to achieve fund support in training practice for untrained cadre and to increase health promotion activity in elderly Integrated Founding Post.
