Abstrak

Karya Ilmiah Akhir ini memaparkan kegiatan praktik residensi spesialis keperawatan anak, mencakup pemberian asuhan keperawatan dan pencapaian kompetensi. Penerapan asuhan keperawatan berfokus pada perawatan anak dengan klien yang terpasang kolostomi. Masalah yang paling sering terjadi adalah risiko kerusakan integritas kulit. Masalah risiko kerusakan integritas kulit adalah berisiko mengalami perubahan kulit yang buruk. Aplikasi Model Adaptasi Roy dapat menyelesaikan masalah klien dengan risiko kerusakan integritas kulit untuk mencapai respon yang adaptif. Keberhasilan asuhan keperawatan ditunjang oleh kompetensi perawat anak melalui berbagai perannya, yaitu sebagai pemberi pelayanan, pendidik, manager, serta peneliti. Pelaksanaan asuhan keperawatan dengan pendekatan Model Adaptasi Roy diharapkan dapat diaplikasikan secara komprehensif dalam mengatasi masalah klien dengan kasus bedah dengan pendekatan konsep family centered care.
