## Abstrak

[<b>ABSTRAK</b><br>

Skripsi ini berupaya untuk mengaitkan antara teori eko-arsitektur yang coba saya angkat dengan realita pada lokasi studi kasus di Bukit Duri, Jakarta Selatan. Metode penulisan yang digunakan dalam skripsi ini ialah metode kualitatif. Skripsi ini berupaya untuk melihat penerapan dari konsep eko-arsitektur pada kawasan pemukiman Bukit Duri dengan ciri ?tepi sungai? Kota Jakarta tersebut. Disaat negaranegara maju menerapkan konsep eko-arsitektur dengan segala keunggulan teknologinya, negara-negara berkembang seperti Indonesia menerapkannya dengan pendekatan berbeda, yaitu pendekatan eko-sosial.;

<b>ABSTRACT</b><br>

This thesis seeks to find connections between the theory of eco-architecture that I try to lift with the reality of the case study sites in Bukit Duri, South Jakarta. Writing method used in this thesis is a qualitative method. This thesis seeks to see the implementation of the concept of eco-architecture in the residential area of Bukit Duri with a characteristic 'river' the city of Jakarta. While developed countries apply the concept of eco-architecture with all the advantages of technology, developing countries like Indonesia to apply the different approaches, namely eco-social approach., This thesis seeks to find connections between the theory of eco-architecture that I try to lift with the reality of the case study sites in Bukit Duri, South Jakarta.
