Abstrak

Skripsi ini membahas pengetahuan ibu hamil tentang Program Perencanaan Persalinan dan Pencegahan Komplikasi (P4K) dengan stiker. Penelitian ini adalah penelitian kuantitatif dengan desain penelitian cross sectional. Data Penelitian diperoleh dengan instrumen kuesioner. Hasil penelitian menyarankan agar Bidan melakukan sendiri penempelan stiker P4K di rumah ibu juga menambah pengetahuan kepada ibu hamil tentang pelayanan ANC sesuai standar, ambulan desa dan stiker P4K, Selain itu pemegang program KIA di Puskesmas dan Dinas Kesehatan lebih meningkatkan kegiatan monitoring dan evaluasi terhadap program ini serta menambah media promosi kesehatan khususnya mengenai program P4K ini.

.....The focus of this research is knowledge of pregnant women about Birthing planning and complication prevention program with sticker. This research is quantitative research with cross sectional research design. The research data is coming from the questioner instrumen. The result of this research is suggesting Midwives to put the "P4K" stickers by herselfes at mother's house, they also must give additional knowledge to pregnant women about standart antenatal care services,rural ambulance and about "P4K" stickers. Besides that,the program holder of mother and child health in public health centers and health department further improve the monitoring and evaluation activities of this program and also add the health promotion media especially about "P4K" program.
