Abstrak

Integrasi teori model need for help Wiedenbach dengan self care Orem pada asuhan keperawatan klien dengan abortus inkomplet menjadi kerangka kerja praktik residensi keperawatan maternitas selama setahun. Laporan ini bertujuan untuk memberikan gambaran asuhan keperawatan pada child bearing normal dan risiko tinggi, bayi baru lahir normal dan risiko tinggi, perempuan yang mengalami masalah reproduksi dan ginekologi, yang dilaksanakan pada tatanan klinik maupun komunitas. Hasil residensi menunjukkan bahwa kedua model tersebut efektif dan efisien dalam membantu mengatasi permasalahan lima klien dan keluarga dengan abortus inkomplet. Pencapaian kompetensi perawat spesialis maternitas dilakukan melalui penerapan peran perawat secara komprehensif.

.....

Integration of theoretical model Wiedenbach "need for help" with Orem "self care" in nursing care to clients with incomplete abortion became framework of maternal health nursing specialist student practice for a year. This report aims to provide an overview of nursing care at risk of normal child bearing and high-risk, normal newborns and high risk, women who experience reproductive problems and gynecology, which conducted at the clinical and community setting. It showed that both models were effective and efficient to five clients and family in solving their problems. The nurse specialist maternity competencies were achieved through applying nurse roles comprehensively.
