Abstrak

Ekspor minyak kelapa sawit merupakan komoditas penyumbang devisa terbesar di beberapa negara ASEAN. Salah satu risiko yang melekat erat dengan perdagangan ekspor adalah exchange rate. Risiko spesifik tersebut terdiri dari country specific risk yang sistematik dan firm specific risk yang non sistematik. Penelitian ini bertujuan untuk mengetahui pengaruh firm specific risk terhadap exchange rate exposure perusahaan sub sektor kelapa sawit di kawasan ASEAN. Penelitian ini mengamati aktivitas hedging yang dilakukan perusahaan sub sektor kelapa sawit sejak Januari 2003 sampai Desember 2012. Model yang digunakan adalah ordinary least square dengan meregresikan 25 sampel perusahaan sub sektor kelapa sawit. Data yang digunakan berasal dari Datastream Thomson Reuters Eikon dan data World Bank. Hasil penelitian menunjukkan bahwa hasil analisis regresi linier beberapa faktor firm specific berpengaruh secara signifikan terhadap exchange rate exposure. Faktor-faktor determinan dari firm specific yang bernilai signifikan terdiri dari market value growth dan likuiditas serta country specific risk. Kata Kunci: firm specific risk, exchange rate exposure, kelapa sawit.
