## Abstrak

[Pharmacy (dispensary) is a pharmacy service facilities which carry out the pharmacy practice by a pharmacist. Pharmacy's personnel have important role directly related to the delivery of services, particularly services included pharmacy prescription services, promotion and education, and residential services (home care). These days, pharmaceutical services had shifted its orientation from the drug oriented to patients oriented refer to Pharmaceutical Care. As a consequence, pharmacists are required to improve the knowledge, skills and behaviors in order to carry out a direct interaction with patients and other health professionals. Pharmacists Internship Program (PIP) activities held on June 19th to August 16th, 2013 in the Atrika Pharmacy to understand the basic tasks, functions, and role of the pharmacist as well as conducting both technical and non-technical pharmacy's practical. The purpose of the specific task was to analyze the suitability of antituberculosis prescribing patterns in Atrika Pharmacy based on National Guidelines for Tuberculosis Control Ministry of Health 2011 through screening of prescriptions and understanding pharmacist's role in the service of antituberculosis drugs in pharmacy., Apotek merupakan sarana pelayanan kefarmasian tempat dilakukan praktek

kefarmasian oleh apoteker. Tenaga kefarmasian mempunyai peranan penting karena terkait langsung dengan pemberian pelayanan, khususnya pelayanan kefarmasian yang meliputi pelayanan resep, promosi dan edukasi, serta pelayanan residensial (home care). Pelayanan kefarmasian saat ini telah bergeser orientasinya dari obat ke pasien yang mengacu kepada Pharmaceutical Care. Sebagai konsekuensi perubahan orientasi tersebut, apoteker dituntut untuk meningkatkan pengetahuan, keterampilan dan perilaku agar dapat melaksanakan interaksi langsung dengan pasien maupun tenaga kesehatan lain. Kegiatan PKPA dilaksanakan pada tanggal 19 Juni – 16 Agustus 2013 di Apotek Atrika dengan tujuan untuk memahami tugas pokok, fungsi, dan peran apoteker serta melaksanakan kegiatan baik secara teknis kefarmasian maupun non teknis kefarmasian di apotek. Sedangkan tujuan dari tugas khusus adalah menganalisis kesesuaian pola peresepan antituberculosis yang terdapat di Apotek Atrika dengan Pedoman Nasional Pengendalian Tuberculosis Kementerian Kesehatan RI tahun 2011 melalui skrining resep serta memahami peran aktif apoteker dalam pelayanan obat antituberculosis di apotek.]
