Abstrak

Pembangunan kesehatan diarahkan untuk meningkatkan kesadaran, kemauan, dan kemampuan hidup sehat bagi setiap orang agar peningkatan derajat kesehatan masyarakat yang setinggi-tingginya dapat terwujud. Rencana Strategis Kementerian Kesehatan periode 2010 - 2014 mengamanatkan Program Kefarmasian dan Alat Kesehatan untuk dapat meningkatkan ketersediaan, pemerataan, dan keterjangkauan obat dan alat kesehatan serta menjamin keamanan atau khasiat, kemanfaatan, dan mutu sediaan farmasi, alat kesehatan, dan makanan. Kementerian Kesehatan melalui Direktorat Jenderal Bina Kefarmasian dan Alat Kesehatan memiliki sasaran meningkatnya sediaan farmasi dan alat kesehatan yang memenuhi standar dan terjangkau oleh masyarakat. Praktek Kerja Profesi Apoteker (PKPA) dilakukan pada 15 Juli - 26 Juli 2013 di Direktorat Jenderal Bina Kefarmasian dan Alat Kesehatan bertujuan untuk memahami peran dan fungsi apoteker dalam melaksanakan pekerjaan kefarmasian khususnya di Direktorat Bina Produksi dan Distribusi Kefarmasian. Sedangkan tujuan dari tugas khusus adalah untuk mengetahui data industri mengenai perizinan, asal bahan baku produksi dan perusahaan penerima kontrak TOLL menjelang SJSN 2014.

.....

Health development is directed to people's awareness, willingness and ability to have a healthy life in order to improve community health status as high as can be realized. The Strategic Plan of Ministry of Health in 2010 - 2014 is mandating Pharmaceutical and Medical Devices programs to improve the availability, equity, and affordability of medicines and medical devices as well as to ensure the safety or efficacy, usefulness, and quality of pharmaceutical preparations, medical devices, and food. The Ministry of Health through the Directorate General of Pharmaceutical and Medical Devices has targeted to increase pharmaceutical preparations and health tools that meet the standards and are affordable. Pharmacist Internship Program was conducted on July 15 to July 26, 2013 at the Directorate General of Pharmaceutical and Medical Devices aims to understand the role and function of the pharmacist in the pharmacy, especially in carrying out the work of the Directorate of Production and Distribution of Pharmaceutical. While the purpose of the special task is to find industry data on licensing, the origin of the raw material production company and TOLL contract ahead of SJSN in 2014.
