Abstrak

[Karya Ilmiah Akhir ini merupakan analisis dari seluruh kegiatan praktik residensi Ners Spesialis Keperawatan Medikal Bedah. Kegiatan tersebut meliputi penerapan model The Dynamic Nurse-Patient Relationship Ida Jean Orlando dalam asuhan keperawatan pasien gangguan sistem kardiovaskular, penerapan praktik keperawatan berdasarkan pembuktian dan melakukan inovasi keperawatan. Pengkajian pasien pada model The Dynamic Nurse-Patient Relationship Ida Jean Orlando berfokus kepada kebutuhan pasien, apabila kebutuhan dipenuhi maka stres berkurang dan akan mendorong pencapaian kesehatan yang optimal. Tugas perawat adalah menemukan kebutuhan pasien yang tidak terpenuhi. Metaparadigmanya hanya ada tiga yaitu human, kesehatan dan keperawatan. Elemen proses keperawatan terdiri dari tiga elemen yaitu perilaku manusia, reaksi perawat dan tindakan keperawatan. Praktik keperawatan berdasarkan pembuktian yang dilakukan adalah massage untuk menurunkan nyeri pada pasien post operasi jantung. Pelaksanaan inovasi keperawatan berupa penyusunan formulir pengkajian keperawatan, identifikasi masalah dan rencana tindak lanjut pasien dengan gangguan kardiovaskular di unit rawat jalan Rumah Sakit Jantung dan Pembuluh Darah Harapan Kita Jakarta., The final scientific paper is the analysis of all activities of

Ners Spesialis Keperawatan Medikal Bedah practice. The activities included the implementation of The Dynamic Nurse-Patient Relationship Ida Jean Orlando Model in as the treatment for patients who suffer the cardiovascular system disturbances, the implementation of nursing practice based on evidence and innovation on nursing, the review on patients of model The Dynamic Nurse-Patient Relationship Ida Jean Orlando which focuses on patient' needs, if the needs can be fulfilled, the stress is decreased and can support the achievement of an optimal health. The job of nurse is to find out the patient's unfulfilled needs. The meta-paradigm has only three elements namely human, health and nursing. The elements of nursing process consists of three elements namely human behaviour, nurse's reaction and nursing action. Nursing practice based on the

verification which was done namely massage to decrease pains for cardiac postoperation patients. The implementation of innovation on nursing is the arrangement of forms for nursing studies: assesment and follow up action for patients with cardiac disturbances at Out-Patient Unit of National Cardiovascular Center Harapan Kita Jakarta.]
