

Cardiotoxicity of non-cardiovascular drugs

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20375778&lokasi=lokal>

Abstrak

First book to deal with this important area of adverse drug reactions, cardiotoxicity is one of the major forms of toxicity seen in drugs and it accounts for most drug recalls and delays experienced in regulatory approvals. Covers four important therapeutic classes: psychoactive drugs; anticancer drugs; non-steroidal anti-inflammatory drugs; and anti-retroviral drugs. Emphasis on the preclinical screening of drug cardiotoxicity, to enable drug developers to test for this toxicity before starting expensive clinical trials.
