Abstrak

[ABSTRAK

Skripsi ini bertujuan untuk melihat gambaran manajemen program penanggulangan penyakit HIV/AIDS di Kota Bogor tahun 2013. Pendekatan penelitian yang digunakan adalah penelitian deskriptif kualitatif. Hasil penelitian menunjukkan bahwa cakupan penjangkauan populasi kunci belum mencapai target. Target penggunaan jarum suntik sudah mencapai target dan target penggunaan kondom belum bisa dihitung. Pada penggunaan sumber daya sebagai input dapat disimpulkan bahwa jumlah belum sesuai untuk petugas penjangkauan, petugas puskesmas dan Dinas Kesehatan. Kebutuhan sarana sangat seperti logistik laboatorium belum mencukupi dalam segi jumlah. Kesedian Dana dari pemerintah belum mencapai 70% target kesedian. Proses perencanaan dibagi menjadi perencanaan APBD dan perencanaan GF namun belum terintegrasi di musrebang. Proses pengawasan yang menjadi tugas KPAD belum berfungsi dengan maksimal. Rekomendasi penyelesaian permasalahan adalah peningkatan fungsi KPAD, peningkatan kuantitas dan kualitas sumber daya, dan peningkatan program.

ABSTRACT

This scriture aims to look at the describe of HIV/AIDS Prevention Program Management in Bogor City 2013. This research are descriptive qualitative research. The results showed that the scope of outreach has not reached the target key populations. Targeted use of sterile needles has reached the target, but the target of condom use can not be calculated. Inputs that used as program resources can be concluded that the amount is not appropriate for outreach, puskesmas?s staff and the Department of Health?s staff. The need for facilities such as logistics laboatorium very inadequate in terms of quantity. Willingness of government funds have not reached the 70% target of willingness. The planning process is divided into the APBD budget planning and GF budget planning, but did not integrated yet in musrebang. Monitoring and evaluation as KPAD control not functioning optimally. Recommendations for solving the problems is an increasing function KPAD, increasing the quantity and quality of resources, and program improvement., This scriture aims to look at the describe of HIV/AIDS Prevention Program Management in Bogor City 2013.
