### Abstrak

[<b>ABSTRAK</b><br>

Skripsi ini membahas tentang pengaruh memori pada hunian milik orang yang merantau. Pada dasarnya manusia senang menetap tetapi saat ada intervensi berupa perpindahan, pola kehidupan tersebut akan berubah. Dua responden berlatar belakang keluarga Minang - yang memiliki tradisi merantau dalam sistem adatnya - dan saat ini merantau ke Depok digunakan sebagai narasumber studi kasus. Melalui perbandingan hunian sebelum merantau dengan hunian saat ini di Depok, baik dari segi aktivitas maupun kondisi tempat tinggalnya, terlihat bahwa memori berpengaruh penting dalam membentuk tempat untuk menghadirkan kembali sense of home di perantauan. Namun, di sisi lain, proses merantau berdampak pada pengikisan memori itu sendiri.

<b>ABSTRACT</b><br>

This thesis discusses about the influence of memory on the habitation of perantau. Basically humans like to settle but when there is intervention of migration, their patterns of life will change. Two respondents from Minang family background - which has a tradition of merantau in their tradition system - and at this moment merantau to Depok were used as case study resources. Through the comparison of their habitation before merantau with current habitation at Depok, both in terms of activity and living conditions, it appears that memory is an important influence in shaping the place to bring back a sense of home in perantauan. However, on the other hand, merantau impacted on deletion of memory itself.;

This thesis discusses about the influence of memory on the habitation of perantau.
