Abstrak

[ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan pemeriksaan kehamilan di puskesmas dengan self efficacy dalam menghadapi persalinan pada ibu primigravida trimester ketiga di lima wilayah kerja puskesmas di Depok. Metode penelitian ini menggunakan desain deskriptif korelatif dengan pendekatan cross-sectional yang melibatkan 92 orang ibu primigravida trimester ketiga dengan teknik stratified sampling di lima wilayah kerja puskesmas di Depok. Hasil penelitian menunjukkan 54,3% responden sudah memiliki kesiapan untuk menghadapi persalinan, dan 50 % responden mendapatkan pelayanan pemeriksaan kehamilan yang baik. Hasil uji Chi Square menyatakan bahwa tidak terdapat hubungan antara pemeriksaan kehamilan di puskesmas dengan self efficacy persalinan pada ibu primigravida ($p= 0.83, \#945;= 0.05$). Penelitian ini memberikan implikasi sebagai data penunjang untuk melakukan penelitian serupa dengan melihat faktor-faktor lain yang berhubungan dengan self efficacy persalinan. Rekomendasi dari penelitian ini agar penelitian selanjutnya dapat melibatkan responden yang lebih besar, mencari faktor- faktor lain yang mungkin berhubungan dengan self efficacy persalinan.

ABSTRACT

This research aimed to know the relation between antenatal care in public health center and childbirth self efficacy among third trimester- primigravida in five public health center in Depok. This research used correlative study and cross sectional design by involving 92 primigravida who have chosen by stratified sampling. The result showed that 54.3% mothers has good childbirth self efficacy, and 50 % mothers gained good antenatal care. The chi square test showed there was no relation between antenatal care and childbirth self efficacy ($p= 0.83, \#945;= 0.05$). The implication of this research was as supporting and additional data to similar research by figuring out other factors which are related to childbirth self efficacy. This research recommended more samples to be involved and do research by searching another relating factor toward childbirth self efficacy.;This research aimed to know the relation between antenatal care in public health center and childbirth self efficacy among third trimester- primigravida in five public health center in Depok.
