Abstrak

[ABSTRAK

Untuk menggunakan hak-hak berdaulatnya atas landas kontinen ekstensi secara sah, negara pantai harus memperoleh rekomendasi dari Commission on the Limits of the Continental Shelf (CLCS) dengan cara mengajukan informasi mengenai batas-batas landas kontinen ekstensinya kepada CLCS. Dalam beberapa kasus, submission negara pantai tumpang tindih dengan submission negara pantai lainnya yang berujung pada ditanggungkannya submission. Skripsi ini akan membahas beberapa potensi tumpang tindih submission di Arktik, yang dilakukan dengan penelitian yuridis normatif. Dalam kesimpulannya, penulis menemukan bahwa negara-negara pantai Arktik dapat menyepakati suatu delimitasi sebelum submission atau membuat suatu joint submission untuk menghindari terjadinya tumpang tindih submission di Arktik.

ABSTRACT

To legally exercise its sovereign rights over extended continental shelf, coastal State has to obtain recommendation from Commission on the Limits of the Continental Shelf (CLCS) by submitting information on the limits of its extended continental shelf to the CLCS. In some cases, such submission overlaps with other submission leading to deferred submission. This thesis will address some potential overlapping submissions in the Arctic which is carried out through a normative legal study. In conclusion, researcher finds that Arctic coastal States may agree on delimitation before submission or establish a joint submission to avoid any overlapping submission in the Arctic.;To legally exercise its sovereign rights over extended continental shelf, coastal State has to obtain recommendation from Commission on the Limits of the Continental Shelf (CLCS) by submitting information on the limits of its extended continental shelf to the CLCS.
