Abstrak

ABSTRAK

Penulisan penelitian ini dilatarbelakangi oleh fenomena kerentanan remaja yang hidup dalam status ekonomi yang tergolong miskin terhadap penggunaan narkoba. Penelitian ini hendak mengkaji peran FGD yang dilakukan oleh BNN terkait pencegahan bahaya penyalahgunaan Narkoba di lingkungan sekolah, kampus, dan perkantoran yang sasaran utamanya ialah remaja. Teori yang digunakan pada penelitian ini ialah community crime prevention, theory programme evaluation, dan teori perubahan perilaku Sedangkan metode yang digunakan ialah metode penelitian kualitatif, peneliti melakukan wawancara dan Focus Group Discussion terhadap dua kelompok yaitu remaja peserta FGD oleh BNN dan tokoh masyarakat. Kesimpulan dari penelitian ini adalah belum maksimal kegiatan FGD dikarenakan tidak adanya evaluasi terhadap kegiatan. Minimalnya hubungan BNN dengan stakeholder belum menciptakan pencegahan komunitas.

ABSTRACT

This research taking background from emerging phenomena of adolescents lived under poverty's vulnerability to drugs abuse. This research aims to examine the role of FGDs implemented by National Narcotics Agency (BNN) in correlation with drugs abuse prevention in the environment of schools, college and office with adolescents as its main target. This research had used the theory of community crime prevention, theory programme evaluation, and behavioral shifts theories. The research method is qualitative, which implemented through interviews and focus group discussions on two groups: adolescents belongs to FGD by BNN and community leaders. The conclusion of this research was the FGD program were not maximized since there was no evaluation had done for this program, while the lack of coordination between BNN and other stakeholders has made the community crime prevention is yet to come.
