Abstrak

[<b>ABSTRAK</b>

Skripsi ini membahas mengenai gambaran umum sarapan, aktivitas fisik, kebugaran aerobik, IMT/U, asupan gizi dan bimbingan belajar serta kaitannya dengan prestasi belajar. Penelitian ini dilakukan pada siswa siswi kelas XI IPA di SMAN 1 Bekasi pada bulan April - Mei 2014. Desain penelitian ini adalah cross sectional. Sampel pada penelitian ini diambil menggunakan metode total sampling dengan jumlah sampel minimal adalah 130. Hasil penelitian menunjukkan terdapat 57.6% siswa memiliki prestasi belajar kurang dan 42.4% siswa memiliki prestasi belajar baik. Terdapat hubungan yang bermakna antara asupan gizi yaitu asupan energi dengan prestasi belajar siswa. Tidak ditemukan hubungan yang bermakna antara sarapan, aktivitas fisik, kebugaran aerobik, IMT/U, dan bimbingan belajar dengan prestasi belajar siswa.
