Abstrak

[**ABSTRAK**]

Tesis ini membahas mengenai urgensi kewajiban untuk melekatkan sidik jari penghadap pada minuta akta notaris berdasarkan Undang-undang Nomor 2 Tahun 2014 tentang Jabatan Notaris guna lebih menjamin kepastian identitas. Saat ini belum terdapat pengaturan lebih lanjut mengenai teknis pelaksanaannya, sehingga penelitian ini menguraikan formalitas perlekatan sidik jari yang benar, baik yang diambil secara manual (basah) maupun elektronik, berdasarkan Undang-undang Nomor 2 Tahun 2014 tentang Jabatan Notaris, Undang-undang Nomor 11 Tahun 2008 tentang Informasi dan Elektronik, serta ilmu daktiloskopi. Sebagai konsekuensinya notaris juga bertambah lagi amanatnya untuk melindungi sidik jari yang diambilnya yang merupakan data pribadi penghadap.

ABSTRACT

This thesis discusses the urgency of notary's obligation based on Law Number 2 Year 2014 to attach fingerprint(s) of person who appears before the notary to the notarial deeds and acts in order to ensure his or her identity and legal capacity. Currently there has been no further regulation regarding its implementation. This thesis explains how to attach manual and electronic fingerprints according to Law Number 2 Year 2014, Law Number 11 Year 2008, and dactyloscopy. Consequently, notary will also bear the obligation to protect the fingerprints as the personal data; This thesis discusses the urgency of notary's obligation based on Law
