Abstrak

Penelitian Sistem Informasi Manajemen Klinik Gumayun di Kabupaten Tegal dengan Berbasis Web, dilatarbelakangi adanya ketidaksesuaian laporan kegiatan serta laporan keuangan di Klinik Gumayun. Tujuan penelitian adalah sistem informasi manajemen untuk pelayanan kesehatan di klinik Gumayun. Variabel penelitian ini adalah pada aspek ketersediaan data dan informasi, relevansi data dan informasi, kecepatan laporan dan akurasi data. Hasil penelitian menunjukkan bahwa sistem informasi di klinik Gumayun sebelum pengembangan sistem belum dapat menghasilkan informasi secara mudah, tepat waktu, akurat dan relevan. Dengan demikian diharapkan pengembangan sistem informasi manajemen dapat meningkatkan kualitas data dan informasi di Klinik Gumayun. Kesimpulanya adalah sistem informasi yang terkomputerisasi dapat memudahkan pencatatan dan pelaporan distribusi obat, laporan kunjungan pasien dan juga laporan keuangan serta dapat memberikan informasi kepada masyarakat. Saran yang dapat diberikan adalah perlu adanya petugas yang bertanggung jawab untuk memelihara dan mengembangkan sistem, petugas klinik yang ada dapat dimanfaatkan pada masing - masing ruang pelayanan sesuai dengan tugas dan fungsinya,.Selain itu, sistem informasi manajemen ini dalam implementasi kedepan, masih dapat dikembangkan sesuai dengan kebutuhan dan diharapkan dapat diintegrasikan terhadap pelaporan dari klinik swasta ke instansi pemerintah seperti Puskesmas dan Dinas Kesehatan.

......

Clinical Research Management Information System Gumayun in Tegal district based on web highlighted with in order to avoiding the discrepancy of the activity reports and financial reports at that clinic. The purpose of this research is to develop a management information system for health care services in the clinic. The variables of this research based on the aspects of the availability of data and information, the relevance of data and information, the speed of report and also the accuracy of data. The results of this research showed that the information system at the Gumayun clinic before the development of the system has not been able to generate information in an easy, timely, accurate and relevance. Hopefully, by the development of the management information system will improve the quality of data and information at the Gumayun clinic from the element of convenience, timeliness, accuracy, and relevancy. The conclusion of this research is by using the computerized information system services that can establish it easier to recording and reporting of the drug distribution, reporting patiens and also on the report about financial results and information to many people. Advice that can be given is to deploy the system into the services at the clinic activities at the Gumayun clinic, and also it needs the health care personnel who can be responsible for maintaining and developing the system so that when the system is needed, the system can be used easily. The existing clinic personnel can be utilized on every services area based on the function. In addition, the management information system in the implementation of the future, they can be developed according to the needs and are expected to be integrated to the reporting of private clinics to health centers and government agencies such as the Department of Health.
