[<b>ABSTRAK</b><br>

Tesis ini membahas Analisis Kesiapan Implementasi Kebijakan Jaminan Kesehatan Nasional Tahun 2014 (Peraturan Presiden No. 12 dan 111 tahun 2013 tentang Jaminan Kesehatan) dari Sisi Regulator. Penelitian ini dilakukan dengan pendekatan kualitatif menggunakan teori implementasi Edward III. Hasil penelitian menunjukkan adanya permasalahan komunikasi yaitu kurangnya upaya sosialisasi dan adanya aturan yang dinilai belum harmonis dan adanya disparitas pelayanan kesehatan dari sisi sumber daya. Dari sisi disposisi, para pemangku kepentingan kebijakan Jaminan Kesehatan Nasional memiliki sikap yang menghambat kesiapan implementasi yang dapat dilihat dari informasi penetapan besaran iuran premi. Dari sisi struktur organisasi sudah terjalin koordinasi dengan baik antar atau antara pemangku kepentingan. Kesimpulannya adalah belum siapnya implementasi Jaminan Kesehatan Nasional. Saran yang dapat dilakukan agar implementasi dapat berakselerasi dengan baik adalah sosialisasi hendaknya dilakukan secara masif dan efektif dengan menggunakan berbagai cara dan perlu adanya melibatkan masyarakat. Saran untuk mengurangi disparitas pelayanan kesehatan adalah mendorong pemerintah daerah untuk segera mendirikan berbagai fasilitas kesehatan di daerah upaya untuk akselerasi pembangunan kesehatan. Selain itu perlu aturan yang menetapkan penempatan tenaga kesehatan di seluruh Indonesia agar tujuan Universal Health Coverage dapat tercapai di 2019 sesuai dengan Road Map Jaminan Kesehatan Nasional.

<b>ABSTRACT</b><br>

This thesis discusses the Implementation Readiness Analysis of National Health Insurance Policy in 2014 (Presidential Decree. 12 and 111 of 2013 on Health Insurance) from the regulator view. This study was conducted with a qualitative approach using the implementation theory of Edward III. The results showed the existence of communication problems, namely the lack of socialization and regulation efforts are not yet harmonized and health care disparities in terms of resources. In terms of the disposition, the stakeholders of the National Health Insurance policy to have an attitude that impede implementation readiness that can be seen from the determination of the amount of dues premium information. In

terms of organizational structure has been established with a good coordination between or among stakeholders. The conclusion is unprepared implementation of National Health Insurance. Suggestions to do in order to accelerate the implementation of socialization should be done well is massively and effectively using a variety of ways and the need for community involvement. Suggestions to reduce health care disparities is encouraging local governments to immediately establish various health facilities in the region to accelerate health development efforts. Also needs to be a rule that defines the placement of health personnel throughout Indonesia agar goal can be achieved Universal Health Coverage in 2019 in accordance with the Road Map for National Health Insurance; This thesis discusses the Implementation Readiness Analysis of National Health Insurance Policy in 2014 (Presidential Decree. 12 and 111 of 2013 on Health Insurance) from the regulator view.
