Abstrak

[ABSTRAK

Tesis ini membahas implementasi kebijakan efisiensi di Rumah Sakit Islam Arafah Jambi. Penelitian ini menggunakan pendekatan kuantitatif dengan desain potong lintang dan pendekatan kualitatif dengan wawancara mendalam. Kebijakan efisiensi yang dibuat rumah sakit terdiri dari pelaksanaan tindakan apendiktomi tanpa berdasarkan clinical pathway, pembuatan standar obat khusus dan perubahan pola pembayaran jasa medis. Penelitian dilakukan terhadap berkasberkas pasien peserta JKN dengan tindakan apendiktomi tanpa komplikasi yang memenuhi kriteria inklusi. Hasil penelitian memperlihatkan bahwa pelaksanaan tindakan apendiktomi tanpa komplikasi sudah berjalan sesuai clinical pathway dan biaya untuk tindakan operasi khususnya apendiktomi tanpa komplikasi sudah ada efisiensi, proporsi dari biaya ini yang terbesar adalah dibayarkan untuk jasa medis, diikuti dengan akomodasi lalu biaya farmasi dan tindakan penunjang. Rumah sakit sebaiknya melengkapi diagnosa dan tindakan terbanyak di rumah sakit dengan clinical pathway untuk mempermudah menghitung biaya perawatan dan membuat pola jasa medis yang sesuai dengan pola pembiayaan INA CBG?s.

ABSTRACT

This thesis discusses the efficiency of policy implementation in Arafah Islamic Hospital, Jambi. The study uses a quantitative approach with a cross-sectional design and a qualitative approach with in-depth interviews. Efficiency policies created by hospital consists of the implementation of the appendectomy based on clinical pathways, creation of specialized drug standards and changing patterns of medical service payments. Research conducted on the files participant JKN patients with uncomplicated apendiktomi that met the inclusion criteria. Research results show that the implementation of the action without complications apendiktomi is going according to clinical pathways and costs for particular surgery existing efficiency, the proportion of these costs are paid for most medical services, followed by accommodation and pharmacy costs and supporting actions. Hospital diagnosis and action should complement most in hospitals with clinical pathways to facilitate calculating the cost of care and make medical services pattern that matches the pattern of financing INA CBG

Key Words : Efficiency, INA CBG's, Claim, Clinical Pathway , JKN
