Abstrak

[<b>ABSTRAK</b><br>

Penting untuk merencanakan kehidupan berkeluarga sejak masa remaja. Penelitian ini merupakan analisis dari data SKRRI 2007 dan SDKI KRR 2012 yang bertujuan untuk mengetahui dan membandingkan rencana remaja dalam kehidupan berkeluarga serta faktor-faktor yang berhubungan serta menggunakan desain komparatif. Hasil penelitian menunjukkan sekitar 30% remaja pada SKRRI 2007 dan 38,5% pada SDKI KRR 2012 memiliki rencana baik dalam kehidupan berkeluarga. Pada SKRRI 2007 hanya faktor kelompok umur yang tidak berhubungan. Sedangkan pada SDKI KRR 2012, semua faktor berhubungan. Faktor yang paling dominan dari kedua data sekunder tersebut yaitu pengetahuan tentang metode KB. Saran ditujukan bagi keluarga, masyarakat, Kemenkes, BKKBN, Kemendikbud, DPR dan Kominfo.
