## Abstrak

[<b>ABSTRAK</b><br>

Energi dan pangan memiliki peran yang penting dalam suatu negara.

Kenaikan pada harga energi dan pangan memberikan dampak pada rumah tangga dan komoditas lain. Tujuan dari studi ini adalah untuk mengidentifikasi dampak guncangan harga energi dan pangan terhadap harga komoditas lain, biaya hidup rumah tangga serta perubahan tingkat kemiskinan dan ketimpangan di Indonesia. Metode yang digunakan untuk menganalisis dampak tersebut adalah model Social Accounting Matrix (SAM). Penelitian ini menemukan bahwa kenaikan harga pangan cenderung memiliki pengaruh yang lebih besar daripada energi, baik pengaruh terhadap kenaikan harga lain ataupun terhadap biaya hidup rumah tangga dan kemiskinan.

<b>ABSTRACT</b><br>

Energy and food has important roles in a country. The fluctuations of food price and energy price has great impact to other commodities and households. The goal of the study is to identify the energy and food price shocks of other commodity prices, the cost of living on household, the poverty and inequality in indonesia. This study use Social Accounting Matrix (SAM) model as a tool to analyze that impact. The research found that the rise in food prices tend to have more influence than energy on the commodity price and the cost of living on household.;
