[ABSTRAK

Biaya pengobatan semakin meningkat akibat inflasi dan teknologi yang semakin maju, maka clinical pathway adalah alat yang tepat sebagai kendali mutu dan biaya. Adanya clinical pathway seksio sesarea di RS Awal Bros Tangerang tetap menimbulkan variasi terapi yang berakibat pada variasi tagihan, oleh karena itu clinical pathway yang ada perlu direvisi. Tesis ini membahas faktor ? faktor yang mempengaruhi variasi tagihan seksio sesarea selama bulan Desember 2013 ? Februari 2014 di Rumah Sakit Awal Bros Tangerang yang hasilnya digunakan untuk merevisi isi clinical pathway seksio sesarea yang sudah ada. Desain yang digunakan dalam penelitian ini adalah observasional dengan pengambilan data secara crosseksional dengan metode kuantitatif dilanjutkan kualitatif. Hasil penelitian mendapatkan clinical pathway baru yang sesuai dengan bukti praktek klinis terbaik dengan biaya paling efisien. Diperlukan dukungan semua pihak terutama dokter spesialis untuk mematuhi clinical pathway yang baru . Variasi tagihan seksio sesarea dipengaruhi jenis pembiayaan, kelas perawatan, tindakan tambahan selain seksio sesarea.
