Abstrak

[ABSTRAK

Nutrisi yang baik berkontribusi pada tumbuh kembang anak usia sekolah. Tujuan penelitian ini mengetahui hubungan karakteristik keluarga dan tugas kesehatan keluarga dalam pemenuhan nutrisi dengan status gizi anak usia sekolah. Desain penelitian cross sectional, menggunakan metode proportional random sampling, responden sebesar 276. Sampel penelitian siswa kelas 4-5 beserta orangtua siswa di SD wilayah kelurahan Pondokraggon. Uji statistik menggunakan chi-square dan regresi logistik. Hasil penelitian menunjukkan ada hubungan signifikan jumlah anak dalam keluarga, kemampuan keluarga merawat dengan status gizi anak usia sekolah. status gizi anak usia sekolah tidak terlepas dari kemampuan keluarga melakukan tugas kesehatan keluarga khususnya kemampuan keluarga merawat.
