## Abstrak

[Kesehatan merupakan kebutuhan esensial bagi setiap individu. Upaya terus dilakukan untuk memelihara dan meningkatkan derajat kesehatan masyarakat dengan cara peningkatan kualitas tenaga kesehatan dan sistem pelayanan yang teroganisir dengan baik serta ditunjang oleh sarana kesehatan yang memadai. Apotek termasuk dalam sarana kesehatan yang berperan dalam upaya-upaya kesehatan terutama dalam pendistribusian dan pemberian informasi obat kepada masyarakat. Menurut PP No. 51 tahun 2009, apotek adalah sarana pelayanan kefarmasian tempat dilakukan praktik kefarmasian oleh Apoteker. Apoteker adalah Sarjana Farmasi yang telah lulus dan telah mengucapkan sumpah jabatan Apoteker. Persyaratan tenaga kerja di apotek adalah memiliki Apoteker Pengelola Apotek (APA). Tanggungjawab APA antara lain adalah memimpin seluruh kegiatan apotek, baik kegiatan teknis maupun non-teknis kefarmasian sesuai dengan ketentuan yang berlaku serta memastikan ketersediaan, penyimpanan, dan penyerahan sediaan farmasi yang bermutu baik dan keabsahannya terjamin. Sediaan farmasi adalah obat, bahan obat, obat asli Indonesia, alat kesehatan, dan kosmetika. Obat digolongkan menjadi 4 kategori, yaitu obat bebas, obat bebas terbatas, obat keras, dan obat golongan narkotika. Pelayanan resep di Apotek Atriika berdasarkan langkah HTKP (Harga, Timbang, Kemas, Penyerahan). Langkah pelayanan resep adalah skrining, perhitungan harga obat, peracikan, pengemasan, dan penyerahan disertai dengan informasi obat.;Health is an essential requirement for every individual. Many efforts have made to maintain and improve the health of the community by improving the quality of health and care system and supported by adequate health facilities.
