Abstrak

[Kehamilan diharapkan dapat berlangsung aman dan lancar hingga melahirkan. Akan tetapi wanita hamil sangat beresiko mengalami penyulit atau komplikasi yang tidak diinginkan, salah satunya adalah abortus inkomplit. Fenomena tersebut mendorong profesi keperawatan untuk terus mengembangkan ilmu sejalan dengan tuntutan masyarakat terhadap pelayanan kesehatan yang berkualitas. Laporan ini bertujuan menggambarkan pelaksanaan praktek residensi keperawatan maternitas selama satu tahun, meliputi asuhan keperawatan pada masa childbearing normal dan resiko tinggi, bayi baru lahir normal dan resiko tinggi, perempuan yang mengalami masalah reproduksi dan ginekologi di tatanan klinik maupun di komunitas. Residen juga melakukan asuhan keperawatan pada kasus focus of interest yaitu abortus inkomplit dengan mengaplikasikan teori need for help yang dikombinasikan dengan teori social support. Laporan ini juga mengemukakan hambatan dan dukungan pada pelaksanaan praktek residensi. Selain itu, laporan ini juga memaparkan tentang kegiatan pencapaian kompetensi perawat spesialis maternitas melalui penerapan peran sebagai pemberi perawatan, pendidik, konselor, koordinator, komunikator, advokat, agen perubahan dan peneliti.

.....Pregnancy is expected to take place safely and smoothly until delivery. However, pregnant women are particularly at risk to experience complications or unwanted complications, one of which is an incomplete abortion. This phenomenon encourages the nursing profession to continue to develop in line with the science community demands for quality health care. This report aims to describe the implementation of maternity nursing practice residency for one year, covers nursing care during the childbearing normal and high-risk, normal newborns and high-risk women who have problems in reproductive and gynecological clinic and in the community structure. Resident also performs nursing care on a case that is the focus of interest by applying the theory of incomplete abortion need for help is combined with the theory of social support. The report also noted the barriers and support the implementation of the practice residency. In addition, this report also describes about the activities of achievement of competencies through the application maternity nurse specialist role as caregiver, educator, counselor, coordinator, communicator, advocate, change agent and researcher., Pregnancy is expected to take place safely and smoothly until delivery.
