Abstrak

[Diagnosis keperawatan yang ditemukan pada klien skizofrenia salah satunya adalah isolasi sosial. Tujuan Karya ilmiah adalah diketahui hasil penerapan latihan keterampilan sosial dan psikoedukasi keluarga pada klien isolasi sosial menggunakan pendekatan Modeling dan Role Modeling. Tindakan keperawatan yang diberikan berupa tindakan keperawatan generalis dan spesialis latihan keterampilan sosial pada 19 klien dan keluarga sedangkan pada kelompok kedua yaitu tindakan keperawatan generalis dan spesialis latihan keterampilan sosial dan psikoedukasi keluarga pada 6 klien dan keluarga. Hasilnya menunjukkan bahwa kelompok yang mendapatkan tindakan generalis, latihan keterampilan sosial dan psikoedukasi keluarga lebih besar menurunkan tanda dan gejala serta peningkatan kemampuan sosialisasi dibandingkan pada kelompok yang mendapatkan tindakan keperawatan generalis dan latihan keterampilan sosial. Hasil Karya ilmiah ini direkomendasikan untuk dilakukannya tindakan keperawatan latihan keterampilan sosial dan psikoedukasi keluarga pada klien isolasi sosial di Rumah Sakit Jiwa.
