Abstrak

[Penelitian ini membahas tentang tingkat kontrol sosial mengenai permisivitas seksual mahasiswa kos dilihat dari tiga dimensi yaitu dimensi preventif, represif, dan kuratif. Penelitian ini juga melihat perbedaan kontrol sosial mahasiswa berdasarkan tipe kos, yaitu tipe kos horizontal dan tipe kos vertikal. Menggunakan pendekatan kuantitatif dengan teknik survei terhadap 32 responden dan menggunakan teknik non probability sampling yaitu sampling aksidental. Hasil penelitian menemukan bahwa kontrol sosial mengenai permisivitas seksual mahasiswa di tempat kos rendah, baik kos vertikal, maupun kos horizontal. dimensi preventif, represif dan kuratif juga cenderung rendah, sehingga mahasiswa lebih permisif mengenai seksualitas. Saran berupa perlu adanya pembenahan terhadap kontrol yang sudah dilakukan, dengan memperketat peraturan dan menjalankan program-program yang positif untuk mahasiswa., This research discuss about the level of Social control about sexual permissiveness of college student that live in the “kos” from three dimension, which are preventive dimension, repressive dimension, and curative dimension. This research is also discuss about the difference of social control of college student based on the type of “kos”, which are horizontal “kos” and vertical “kos”. This research using quantitative approach with the technique survey of 32 respondents by using non probability sampling, sampling aksidental technique. The result of this reseach found that the social control about sexual permissiveness of college student in the “kos” is low, either the vertical “kos” or the horizontal “kos”. The preventive dimension, repressive, and curative is also tend to be low, so the college student is more permissive about sexuality. Suggestions that writer can give are there should be any improvement for the control by tighten the rules and run positive programs for college student.]
