

Molecular biology in medicinal chemistry / edited by Th. Dingermann, D. Steinhilber and G. Folkers

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20394257&lokasi=lokal>

Abstrak

Explains the identification of molecular targets via cellular assays, reporter genes or transgenic models, as well as surveying recent advances in the synthesis, separation and analysis of drugs. A special section is devoted to molecular genetics methods.
