Abstrak

The book addresses the basics, applications, and manufacturing of plasmid biopharmaceuticals. The survey of the most relevant characteristics of plasmids provides the basics for designing plasmid products (applications) and processes (manufacturing). Key features that the authors include in the book are: i) consistency and clear line of direction, ii) an extensive use of cross-referencing between the individual chapters, iii) a rational integration of chapters, iv) appellative figures, tables and schemes, and v) an updated, but selected choice of references, with a focus on key papers.
