Abstrak

How are sexuality and erotic desire expressed in language? Do gay men and lesbians have a language of their own? Does 'no' always mean no? Is sexual desire beyond words? This lively and accessible textbook looks at how we talk about sex and why we talk about it the way we do.

Drawing on a wide range of examples, from personal ads to phone sex, from sadomasochistic scenes to sexual assault trials, the book provides a clear introduction to the relationship between language and sexuality. Using a broad definition of 'sexuality', the book encompasses not only issues surrounding sexual orientation and identity, for instance whether gay men and lesbians use language differently from straight people, but also questions about the discursive construction of sexuality and the verbal expression of erotic desire.

Cameron and Kulick contextualize their findings within current research in linguistics, anthropology and psychology, and bring together relevant theoretical debates on sexuality, gender, identity, desire, meaning and power.
