

Statistical methods in neuropsychology: common procedures made comprehensible

Maroof, David Aaron, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20396341&lokasi=lokal>

Abstrak

[This book brings together applied statistics and the specialized field of neuropsychology to simplify and demystify test results. It shows how to effectively translate psychometric test data into real-world clinical practice., This book brings together applied statistics and the specialized field of neuropsychology to simplify and demystify test results.
