

Building successful partnerships: a production theory of global multi-stakeholder collaboration

Buckup, Sebastian, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20396497&lokasi=lokal>

Abstrak

Multi-stakeholder partnering has become the 'new mantra' of decision-makers in business, government and civil society. Yet our understanding of what drives success and failure in these institutions remains incomplete. The book introduces a production theory which describes how the relationship between contributions and outputs influences behaviour, and suggests how technology, leadership and governance should be aligned to make partnerships work.
