

Propensity score analysis: statistical methods and applications

Guo, Shenyang, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20396560&lokasi=lokal>

Abstrak

Introduction -- Counterfactual framework and assumptions -- Conventional methods for data balancing -- Sample selection and related models -- Propensity score matching and related models -- Propensity score subclassification -- Propensity score weighting -- Matching estimators -- Propensity score analysis with nonparametric regression -- Propensity score analysis of categorical or continuous treatments -- Selection bias and sensitivity analysis -- Concluding remarks
