

Firms in open source software development: managing innovation beyond firm boundaries

Schaarschmidt, Mario, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20396845&lokasi=lokal>

Abstrak

In this book, the author suggests that firms have basically two options to control project work beyond their boundaries and beyond their vertical command chains. The assumption is discussed against various theories of the firm as well as control theory and empirically tested by analyzing firm engagement in Eclipse open source projects as well as communication work in the Linux kernel project.
