

Sustainability in energy and buildings: proceedings of the 3rd International Conference on Sustainability in Energy and Buildings (SEB'11)

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20398895&lokasi=lokal>

Abstrak

SEB'11 formed a welcome opportunity for researchers in subjects related to sustainability, renewable energy technology, and applications in the built environment to mix with other scientists, industrialists and stakeholders in the field.

The conference featured presentations on a range of renewable energy and sustainability related topics. In addition the conference explored two innovative themes : the application of intelligent sensing, control, optimisation and modelling techniques to sustainability and the technology of sustainable buildings. These two themes combine synergetically to address issues relating to the intelligent building.
