Abstrak

This book is proceedings of the 7th FTRA International Conference on Future Information Technology (FutureTech 2012). The topics of FutureTech 2012 cover the current hot topics satisfying the world-wide ever-changing needs. The FutureTech 2012 is intended to foster the dissemination of state-of-the-art research in all future IT areas, including their models, services, and novel applications associated with their utilization. The FutureTech 2012 will provide an opportunity for academic and industry professionals to discuss the latest issues and progress in this area. In addition, the conference will publish high quality papers which are closely related to the various theories, modeling, and practical applications in many types of future technology.
The main scope of FutureTech 2012 is as follows : hybrid information technology cloud and cluster computing ubiquitous networks and wireless communications multimedia convergence intelligent and pervasive applications security and trust computing IT management and service bioinformatics and bio-inspired computing database and data mining knowledge system and intelligent agent human-centric computing and social networks.
