Abstrak

The volume includes a set of selected papers extended and revised from the International conference on informatics, cybernetics, and computer engineering.

Intelligent control is a class of control techniques, that use various AI computing approaches like neural networks, bayesian probability, fuzzy logic, machine learning, evolutionary computation and genetic algorithms.

ICCE 2011 Volume 1 is to provide a forum for researchers, educators, engineers, and government officials involved in the general areas of Intelligent Control and Network Communication to disseminate their latest research results and exchange views on the future research directions of these fields. 90 high-quality papers are included in the volume.
