Bringing communities together: connecting learners with scientists or technologists

Deskripsi Lengkap: https://lib.ui.ac.id/detail?id=20399634&lokasi=lokal

----

Abstrak

This book focuses on science and technology connective ventures and the complexity inherent in bringing such worlds together. The authors have been 'in the business' of developing such connections and this book brings them together to describe how and why making connections can support the science/technology education sector, the technology/science communities, and the wider sociocultural life. A range of illustrative examples of connections-in-action provide an empirical basis from which to explore and gain insight into the issues for and potential of such connective ventures, alongside a rich mix of critical commentary, arguments, cautions and challenges. Five key principles have been distilled from the collective experience and wisdom of the authors, serving to capture that which underpins effective and efficient connective initiatives.
