

Human ICT implants: technical, legal and ethical considerations

Mark N. Gasson

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20400209&lokasi=lokal>

Abstrak

Commercialisation and growing potential of human ICT implants have generated debate over the ethical, legal and social aspects of the technology, its products and application. Despite stakeholders calling for greater policy and legal certainty within this area, gaps have already begun to emerge between the commercial reality of human ICT implants and the current legal frameworks designed to regulate these products. This book focuses on the latest technological developments and on the legal, social and ethical implications of the use and further application of these technologies.
