Abstrak

This volume comprises thirty individual contributions that together add up to a comprehensive overview of the current situation in vocational education and training, its strengths and weaknesses, and its prospects. VET experts from Canada, the USA, India, China, Japan and Korea, as well as from a number of European countries, focus on their national context and how it fits in to the bigger picture. The contributions combine theoretical discussions from various strands of VET research with evidence from country case studies and examples from current practice.
