

Bones, genetics, and behavior of rhesus macaques: Macaca mulatta of Cayo Santiago and beyond

Qian Wang, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20401422&lokasi=lokal>

Abstrak

The book grows out of a symposium Wang is organizing for the 78th annual meeting of the American Association of Physical Anthropologists to be held in April 2009. This symposium will highlight recent and ongoing research in, or related to, physical anthropology, and reveal the numerous research opportunities that still exist at this unusual rhesus facility. Following an initial historical review of CPRC and its research activities, this book will emphasize recent and current researches on growth, function, genetics, pathology, aging, and behavior, and the impact of these researches on our understanding of rhesus and human morphology, development, genetics, and behavior. Fourteen researchers will present recent and current studies on morphology, genetics, and behavior, with relevance to primate and human growth, health, and evolution.
