

Novel developments in stem cell mobilization : focus on CXCR4

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20401694&lokasi=lokal>

Abstrak

This book reports on CXCR4 antagonists, an exciting new class of compounds that aid in use of stem cells for treatment of leukemia and other cancers. Includes coverage of plerixafor, now approved for stem cell mobilization of lymphoma and myeloma patients.
