

Oxidative stress in cancer biology and therapy

Spitz, Douglas R., editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20401712&lokasi=lokal>

Abstrak

This book in order to stimulate the discussion of how the knowledge gained in the emerging field of oxidative stress in cancer biology can be utilized to more effectively design interventions to enhance therapeutic responses while causing fewer treatment limiting complications. The chapters contained in this volume provide highly informative emerging perspectives on how that selective enhancement of oxidative stress in cancerous tissues can be used as a target for enhancing therapeutic outcomes as well as how selective inhibition of oxidative stress could spare normal tissue damage and inhibit carcinogenesis.
