

Robustness, plasticity, and evolvability in mammals : a thermal niche approach

Jones, Clara B., author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20401764&lokasi=lokal>

Abstrak

The proposed project will place particular emphasis upon the adaptive complex in relation to endogenous (e.g., genomes, neurophysiology) and exogenous (abiotic and biotic, including social environments) organismal features discussed as regulatory and environmental perturbations with the potential to induce, and, often, constrain variability and novelty of form and function
