

Climate and conservation : landscape and seascape science, planning, and action

Hilty, Jodi A., editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20401958&lokasi=lokal>

Abstrak

The book begins with an introductory section that frames the issues and takes a systematic look at planning for climate change adaptation. The nineteen chapters that follow examine particular case studies in every part of the world, including landscapes and seascapes from equatorial, temperate, montane, polar, and marine and freshwater regions.

Climate and conservation offers readers tangible, place-based examples of projects designed to protect large landscapes as a means of conserving biodiversity in the face of the looming threat of global climate change.
