Abstrak

Skripsi ini bertujuan untuk melihat hubungan antara Parenting Self-Efficacy dan Persepsi Dukungan Sosial pada ibu tunggal bekerja dengan anak usia kanak-kanak madya (usia 5-12 tahun). Penelitian ini merupakan penelitian kuantitatif dan termasuk dalam penelitian korelasional serta menggunakan non-probability sampling design. Responden berjumlah 30 orang ibu tunggal bekerja dan diambil datanya menggunakan teknik purposive sampling. Pengambilan data dilakukan dengan alat ukur Self Efficacy for Parenting Task Index dari Coleman dan Karraker (2000) dan Multidimensional of Perceived Social Support dari Zimet, Dahlem, Zimet dan Farley (1988).

Hasil uji statistik menunjukkan tidak terdapat hubungan yang signifikan antara Parenting Self-Efficacy dan Persepsi Dukungan Sosial ($r = 0,0079$; $p > 0,05$). Domain Parenting Self-Efficacy yang memiliki nilai mean tertinggi adalah Health dan domain yang memiliki nilai terendah adalah Recreation. Domain Persepsi Dukungan Sosial yang memiliki nilai mean tertinggi adalah Keluarga sedangkan domain Teman memiliki nilai mean terendah.

.....This study determined to see whether there's correlation between Parenting Self-Efficacy and Perceived Social Support on working single-mother with children in middle childhood (5-12 years) or not. This study formed in correlational quantitative research which used nonprobability sampling design. The respondents were 30 respondents of working single-mother. The data was taken with Self Efficacy for Parenting Task Index from Coleman and Karraker (2000) to measure Parenting Self Efficacy and Multidimensional of Perceived Social Support from Zimet, Dahlem, Zimet dan Farley (1988) to measure Perceived Social Support.

The result indicated that there's no significant positive correlation between the two variables with $r = 0,0079$ and $p > 0,05$. Domain Health had the highest mean score and domain Recreation had the lowest mean score in Parenting Self-Efficacy. In Perceived Social Support, domain Family had the highest mean score whereas domain Friends had the lowest mean score.
