Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20402714&lokasi=lokal>

Abstrak

[WTO sebagai organisasi internasional yang bergerak di bidang perdagangan seharusnya menjadi penggerak perdagangan dunia. Dengan ekonomi Tiongkok yang terus bertumbuh terlebih karena menggunakan pendekatan perdagangan internasional seharusnya mendapat keuntungan lebih apabila menjadi anggota WTO. Tujuan penelitian ini adalah untuk melihat dampaknya keanggotaan WTO Tiongkok terhadap perdagangannya dengan ASEAN+6 yang ditinjau melalui pendekatan model gravitasi. Hasil dari penelitian ini menunjukkan bahwa keanggotaan WTO bagi Tiongkok meningkatkan jumlah perdagangan Tiongkok ke ASEAN+6 yang secara signifikan dibandingkan saat Tiongkok masih belum menjadi anggota WTO. Sehingga keanggotaan WTO dapat diasumsikan meningkatkan jumlah perdagangan negara anggotanya.

.....WTO as an international organization which is focused on trade should be the main engine in world trade. With China's economy ever growing especially because it uses a foreign trade approach would suggest that WTO

accession would be beneficiary for China. The purpose of this study is to analyze the impact of China's WTO accession towards its trade with ASEAN + 6 by using a gravity model approach. The results of this study has shown that China's WTO accession has indeed increased the volume of trade between China and ASEAN + 6 by a significant margin compared to China prior WTO membership. Thus meaning that WTO membership is likely to increase a nations trade volume.
