[ABSTRAK

Hubungan manusia dengan binatang dari waktu ke waktu mengalami perubahan. Pada masa berburu dan meramu, binatang dipandang sebagai sumber makanan dan sandang, namun ketika manusia berhasil mendomestikasi binatang, lambat laun mereka dijadikan sebagai binatang peliharaan. Binatang yang paling umum dijadikan peliharaan adalah anjing, kucing dan burung. Tujuan penelitian ini menggambarkan aspek sosial budaya hubungan manusia dengan binatang dari waktu ke waktu, menganalisa dinamika perubahan yang melatar belakangi pengintegrasian dan peran reptil dalam rumah tangga serta mengkontekstualisasikan makna baru tentang kekerabatan multispecies. Penelitian ini merupakan penelitian kualitatif yang menggunakan metode pengamatan terlibat dan wawancara mendalam di keluarga pecinta reptil. Hasil penelitian ini menunjukkan adanya perubahan cara pandang terhadap reptil yang mempunyai image menyeramkan dalam masyarakat, ternyata dapat dijadikan sebagai binatang peliharaan, bahkan dianggap sebagai part of family di keluarga pecinta reptil. Kesimpulan penelitian ini adalah dengan adanya interaksi yang intens antara manusia dengan reptil telah menimbulkan keterikatan emosi yang dalam, sehingga memunculkan makna baru dalam keluarga pecinta reptil bahwa peran reptil bukan sebatas binatang peliharaan saja namun telah dianggap sebagai kerabat manusia.
